

**REMARKS**

By this amendment, claims 1-35 have been canceled without prejudice or disclaimer. New claims 36-79 have been added, ample support for the new claims being available in the specification. Claims 36-79 are presently pending in this application. Reconsideration of this application for allowance of all pending claims are hereby respectfully requested in view of the amendments to the claims and the following remarks.

In the Office Action, dated August 15, 2006, the Examiner rejected claims 1-35 on the ground of non-statutory obviousness-type double patenting as being unpatentable over claims 1-29 of co-pending Application No. 10/784,868. Claim 1 is rejected under 35 USC 101 “same invention” double patenting in light of claim 1 of the corresponding application.

Claims 1-35, cancelled, are replaced by claims 36-79, directed to machine implemented method (independent claims 36, 73, 75, and 77) and system (independent claim 63) as well as machine readable medium (independent claim 74) relating to various aspects of “providing translated content.” An Amendment is filed contemporaneously in co-pending Application No. 10/784,868, in which claims 1-29 have been canceled and new claims 30-56 added. The newly added claims 30-56 in the co-pending Application No. 10/784,868 are directed to various features relating to the aspect of “synchronizing content in different languages.”

As a reading of the claims of the current application and those of the co-pending application will demonstrate saliently the considerable difference in scope of claimed subject matter, the rejections predicated on double patenting are believed moot. Favorable reconsideration is requested.

To the extent necessary, a petition for an extension of time under 37 C.F.R. 1.136 is hereby made. Please charge any shortage in fees due in connection with the filing of this paper, including extension of time fees, to Deposit Account 500417 and please credit any excess fees to such deposit account.

Respectfully submitted,

McDERMOTT WILL & EMERY LLP
